

FotoPass

The All-purpose Visitor Management System

Basic, Standard and Enterprise Editions

ISO 9001

QM011

Fotopass is the result of an extensive study carried out by Elitser IT Solutions of the 'Visitor management' requirements of various organizations in both the private and public sectors, including highly security-sensitive Defence units.

While screening visitors at the time of their entry to one's unit premises, is important from the point of view of security as well as time management, gathering all possible data about the visitor is equally crucial from the 'customer relations' angle, considering the highly competitive corporate environment today. Such data can be of immense help in gathering and generating leads for potential business.

Fotopass has been developed keeping in mind various criteria involved in knowing and understanding visitors. It captures the photograph of the visitors, as well as their signatures and many other personal details, which would be of immense value to the organization in many ways, including any investigation / enquiry that may be necessitated in the future.

Using **Fotopass**, organizations can issue entry passes to the visitors, which contain a comprehensive range of information about them. Tracing the visitors' whereabouts after they have entered the unit premises is a lot easier, with the help of their photographs, than with simple paper slip passes.

Fotopass can generate various types of entry passes, including:

- Instant Pass
- General Pass
- Vehicle Pass
- Gate Pass

Feature Comparison :

S No.	Feature	Basic (Y/N)	Standard (Y/N)	Enterprise (Y/N)
1	Master Management	Y	Y	Y
	User Management	Y	Y	Y
	Access Rights	N	Y	Y
	Employees			
	Employee ID Card Printing	N	Y	Y
	Prior Appointment	N	Y	Y
