MediSmart –Hospital Management Software

1. Introduction

MediSmart is a comprehensive Hospital Management package specially designed for healthcare sector. This software is mainly developed to meet the requirements of Hospitals in serving the patients in a best way.

MediSmart is comprehensive enterprise-wide software that covers all aspects of management and operations of a hospital. It is designed to help in achieving the best clinical outcomes, optimal financial performance and most importantly patient and employee satisfaction.

MediSmart consists of the following major systems:

1. Operations Management
2. Clinical Systems
3. Materials Management System
4. Support Services System
5. Hospital Management System

These in turn contain numerous subsystems. This software is highly modular and capable of phase-wise deployment. All the subsystems are enterprise-wide and offer their functionality throughout the Hospital in multiple modules.
